DETAILED ACTION

1. This Office Action is the answer to the Amendment filed on May 15, 2006, which paper has been placed of record in the file.
2. Claims 1-57 are pending in this application.

Election/Restriction

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-43 drawn to a method for straight through processing of trades by electronically exchanging data related to financial transaction between a plurality of price providers, classified in class 705, subclass 37.
 - II. Claims 44-57 drawn to a system for electronically exchanging data related to financial transaction including a plurality of gateways linked to a corresponding one of the plurality of electronic portals and a central transit pint links the gateways, classified in class 709, subclass 201.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another materially different process (MPEP 806.05(e)). In the instant case, the invention I drawn to a method for straight through processing of trades by electronically exchanging data related to financial transaction between a plurality of price providers, in contrast, the invention II drawn to a system for electronically exchanging data related to financial transaction including a plurality of gateways linked to a corresponding one of the plurality of electronic portals and a

central transit pint links the gateways. Therefore, the system as claimed can be used to practice another materially different method.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
